CRT DATABASE

Barco Industries, Inc. offers a high quality product line of color monitors designed for broadcast and professional applications.

CTVM 4 SERIES - Precision Color Matched Monitors:

With excellent specifications, features, reliability, AKB for outstanding color temperature stability, the Barco CTVM 4 will require almost no maintenance or readjustment during its life cycle. This measurement instrument is available in three CRT sizes - 13 inch, 19 inch, and 25 inch. The 13 inch and 19 inch models are available in Delta gun or In-line gun configurations.

CTVM 3 SERIES - Precision Multi-Standard Color Monitors:

This standard broadcast quality monitor combines excellent specifications with extreme ease of operation. This unit can also be equipped with up to three different decoders to become a multistandard broadcast quality monitor. The CTVM 3 D is available in two CRT sizes - 13 inch and 19 inch. Both models are available in Delta gun and In-line gun configurations.

CM SERIES - High Quality Professional Monitors:

Barco Industries CM Series color monitors fulfill a wide range of display applications where good picture quality and stability are essential requirements. High resolution dot mask in-line gun CRT's provide precise stable convergence, eliminating the need for readjustments. All models are available with NTSC composite video and RGB inputs and employ Barco Industries' advanced modular design concept to facilitate ease of maintenance. The CM Series is available in three CRT sizes - 9 inch, 13 inch, and 19 inch. The portable CM 22 (9 inch) model has additional special features: AKB auto color temperature stabilization, RGB input, switchable comb filter and AC/DC power operation.

Barco also manufactures Precision High definition color monitors, chroma decoders and off air Television Demodulators. In addition, Computer Display monitors are also available.
